A hierarchical tree diagram illustrating the relationship between three groups: G1, G2, and G3. The diagram is structured as follows:

- A top horizontal line connects the two main branches.
- A vertical line descends from the center of this top line.
- From this vertical line, two horizontal lines branch out:
  - The left horizontal line leads to a box labeled **G1**.
  - The right horizontal line leads to a box labeled **G2**.
- A third horizontal line, labeled **G3**, branches off from the vertical line between the two main branches, positioned below the horizontal line leading to G2.
